Chair. Rep. Susan Concannon

Thank you for allowing me to speak today. I am an opponent to this bill for one reason. The passing of this legislation will disable parental consent while simultaneously giving options to those who may engage in the practice of deception with the means and opportunities to do harm and violate this proposed legislation both in intent and application. If moms, dads, and guardians want to voluntarily participate, they are at liberty to do so after giving direct consent. Simply put, this is not sound policy.

Opting-in, with prior informed and per product exclusivity direct written consent through paper copies, is the only reasonable standard for these matters.

Thank you
