Subj: Testimony for HB 2613 – D.A.R.E. program

Greetings Committee,

Our names are Andy and Rhonda Burris. and we come to you humbly. On January 18, 2023, my wife Rhonda and I lost our beautiful son, Nicholas Cruz Burris, "Cruz", due to Fentanyl poisoning.

Our testimony begins with Cruz – He was a vibrant 15-year-old boy. Like many children his age, me included, was curious about many things in life. And with the evolution of the Social Media platforms, including Snapchat, he decided to answer an advertisement from a local drug dealer. I define them as "predators."

As a prominent leader of his friend circle which we coined, "The Pack", Cruz thought he would adventure where none of his friends have gone before. Tuesday evening, January 17th, 2023, he planned with the drug dealer to deliver a pill to Cruz, perhaps in exchange for \$10.00.... Sometime in the hour of 11pm-ish, Cruz met him in front of our house to make the deal and purchase what Cruz **thought** was a Percocet pill.

As Rhonda and I slept, Cruz sat on his bed and "Face-timed" a couple of his closest friends to share the experience of Cruz getting high. As Cruz ingested the pill, his friends witnessed the tragic events that came shortly after. Cruz's friends witnessed, 1) Cruz Ingesting the illicit drug 2) Cruz Stop breathing 3) then Cruz falling to his side until his death.

Rhonda went to wake him for school Wednesday morning January 18th, 2023, at 6:30am and found him dead, in bed.

Rhonda and I have discussed, to our children, the dangers of taking drugs. including having Jaci and Cruz watch the news with us as we viewed the dangers of taking illicit pills and how people are dying in our country, including children. Fentanyl is our new Pandemic. What Rhonda and I once thought "This could not happen to us", as we live in Kansas, became a living nightmare.

I remember the D.A.R.E programs growing up. I remember the "Just Say No" campaign. It did influence my thought pattern as a teenager in the 80's and I believe it can influence a child today, in a positive way.

I pray Bill No. 2613 gets passed in Kansas. I believe the Fentanyl/drug education should be our State and Country's focus and I cannot under why it was ever discontinued. If our State and Country would focus more on this national crisis, as we do on identity, our beautiful boy may still be alive.

Furthermore, parents must be educated as well.

Thank you for your time,
Andy Burris
