

Bryron McNary
Opponent to HB2801

Dear Chairman Carpenter and members of the House Federal & State Affairs Committee:

I oppose this bill and would like to provide webex testimony concerning the impact it would have on Kansas businesses. I don't believe the state government should be allowing big companies to dominate and run small businesses out. If the bill is passed, it would eliminate most, if not all, locally run Kansas owned vape businesses. The FDA is currently working through regulations and it is a very fluid situation at this time. The State should not get into addressing and making changes until the FDA has made their final determinations.
