

Written Testimony Only

Proponent of SB6

February 11, 2023

Madam Chair Gossage and the Senate Committee on Public Health and Welfare:

I am a proponent of Senate Bill 6 and I ask for your support as well.

Individual liberty, including health freedom, should be protected. The state government and corporations should not be able to force irreversible procedures on employees. The role of public health should be education and recommendation only.

I would appreciate your support of SB6 as this bill will help the citizens of Kansas who prefer to have their elected officials, rather than appointed ones, make decisions.

Sincerely, Elizabeth Groff – Senate District 9
