Proponent
SB12

To the Senate Health Committee:

It is very distressing to hear the stories of children whose lives have been destroyed by transgender propaganda, sometimes resulting in actual mutilation.

God established male and female and He said it was good. No one should seek to put themselves above God.

If it isn't broke, let's not try to fix it and male/female gender distinction is not broke. Let's do everything we can to protect our youth.

This bill should not need to exist, but it does. Please support it. Doctors should work for the good of the people and transgender surgery/hormone treatment does NOT fit that criteria!

In every way possible we need to encourage our youth to appreciate the gender they were assigned by a loving God. This bill is one attempt to support that!

Respectfully,

Connie Newcome
