

Dear Senator:

Last July, a Rand Corporation Study commissioned and founded by DHHS was published proclaiming, "Vaccines are very safe." <https://www.rand.org/news/press/2021/05/26.html>

What was not made clear to the public is that the study was designed in a peer review by high-level "CDC officials" themselves including the CDCs director of immunization safety.

There is a big problem for parents being ordered to give their children every government recommended vaccine, with no exceptions, no questions asked. Barbara Loe Fisher who is the Co-Founder of National Vaccine Information Center states: "If the State can tag, track down and force citizens against their will to be injected with biologicals of known and unknown toxicity today, there will be no limit on which individual freedoms the State can take away in the name of the greater good tomorrow." **"It's a conflict of interest for DHHS to be in charge of vaccine safety AND also license vaccines, AND take money from drug companies to "fast track vaccines" AND partner with drug companies to develop and share profits from vaccine sales AND make national vaccine policies that get turned into state vaccine laws while also deciding which children will and will not get a vaccine injury compensation award.** That is too much power for one federal agency. That is putting the fox in charge of guarding the chicken coop. Barbara Loe Fisher September 14, 2014. <https://www.nvic.org/about/our-work/speaks-out>

Dr. Anthony Fauci's opinions and proclamations have been omnipresent in American media, and some people might assume his ideas and actions are universally supported by scientists or that he somehow represents science and medicine. To the contrary, many leading scientists and scholars around the world opposed lockdowns and other aspects of his pandemic management such as vaccines. They include Nobel laureates and other distinguished, accomplished, widely published, and internationally celebrated scientists. Many have risked their careers, livelihoods and reputations to champion evidence-based science and ethical medicine.

In 2020 when COVID-19 hit, the governmental health regulators, social media, and media companies that populations relied on as champions of freedom, health, democracy, civil rights, and evidence based public policy collectively pivoted in a lockstep assault against free speech and personal freedoms. Instead, they generated fear, promoted obedience, discouraged critical thinking, and urged billions of people to march to a single tune, to get their vaccine which were 'experimental' while shielding the manufacturers from liability. <https://www.globalresearch.ca/introduction-real-anthony-fauci/5763274>

Vaccines should be an "individual choice" and NEVER a requirement in order to receive medical services, attend daycare or public school.

For the past two years the CDC told us that the COVID-19 vaccines would protect us from transmission and infection of the virus. However, science has proven this to be false. Yet, the vaccine continues to be distributed to young children under the "Emergency Use Authorization." It's apparent that our federal health officials have politicized the COVID vaccine development, licensing and policymaking process and rubber stamped the questionable science all for the sake of money. <https://www.newsweek.com/its-time-scientific-community-admit-we-were-wrong-about-coivd-it-cost-lives-opinion-1776630>

This bill does not in the least prevent anyone from getting a vaccine. It simply doesn't force them on our children. Parents should be making decisions for their children, not government.

By the way, if KS state health officials state that they have concerns about a rising measles outbreak, let that register for a minute! Are they admitting that the MMR (measles mumps rubella) vaccine doesn't work?

Pls. review the articles below.

Respectfully,  
Carol Daunis
