

SB 391

Proponent

Hearing: Thursday February 15, 2024

8:30 AM Room 548-S

Dear Chairwoman Gossage and Members of Committee on Health and Welfare,

I am very much in favor of SB 391. Protecting our Health Freedoms are critical as we hopefully learned while navigating the chaos of the Pandemic. Coercive mandates absolutely violate an individuals' bodily autonomy such as being forced to take a vaccine to keep our jobs, along with the detrimental mandatory mask directives that Dr. Fauci and crew knew were not effective in preventing the spread of the virus. We the people must be allowed to make our own health and medical decisions including quarantine without fear of repercussions. Please support the limit of control the Secretary of Health and Environment has regarding these incredibly important personal decisions.

Thank you,

Jason Meirowsky
