Senate Committee on Public Health and Welfare

SB 391

Proponent, written testimony only

Respected Chair Gossage and Committee Members,

I am a proponent of this bill and ask that you please pass it favorably out of committee. It is my understanding this was last years SB 6 and it has been sitting in the House Health and Human Services Committee all this time. It is quite appalling that the House Committee would not act on such a basic and important Bill! Now is your opportunity to make things right.

We, as Americans and free people, ***shall*** have the right to make our own health decisions and no one else. While actions may be made and/or recommended, the final decision is ours.

I am a proponent of SB 391 and ask that you pass it favorably out of Committee.

Most sincerely,

Jill O'Connor
