SB 314 -- Bill regarding fishing licenses for Senior Adults

Written Testimony

Dear Agriculture and Natural Resources:

We are not in favor SB 314 regarding people 65 years of age and older being required to have fishing licenses.

We are 69 and 68 years old respectively this year. For this reason we only go fishing maybe four or five times a year with our grandchildren. Our grandson is just getting ready to turn five this year. We are trying to teach him that a fish does not come out of a box and then get put in a microwave. We need to teach our grandchildren how to fish and how to be careful around large bodies of water. We need to teach our youth about how nature works and taking them fishing is a good learning experience.

Thank you,

Ronald and Navella Richey
