---

Good afternoon Debbie. My name is Robin R. Lais. I would like to be allowed to speak tomorrow Jan. 24, 2012 on House Bill 2330, Brenda Landwehr Chairperson House Health and Human services Committee; at 1:30 pm Docking building room 784. Located at 915 S. W. Harrison Street. I am a small business owner in Wichita, KS. I am not a hemp smoker. However, I am a supporter of the medical approved use of hemp. I have seen with my own eyes hemp oil help and cure cancer. I have seen with my own eyes people with mental health disorders able to function again in a calm manner. I have seen people in so much pain they were crying and shaking; the Doctors kept giving them more prescription drugs in higher doses. With Hemp oil they are now off all drugs, pain free, alive again. Every since I spent a summer years ago, taking care of my Mother passing away from Cancer; I have made a a life changing choice to try and research what can be done. I have spoke to many doctors, hospice care givers, mental health consultants, and the list goes on. I have met so many people from coast to coast that are alive today because of medical hemp. May I please have a few moments tomorrow to share this information?  
Thank you so very much.

Robin R. Lais
