Subject: HB 2735 - Transportation Committee hearing: March 5, 2012

To all House Transportation Committee members:

I'm asking you to oppose HB2735 as it would severely cripple our ability to raise funds to continue building our trails. Potential donors aren't going to want to pay taxes, they want to build trail. This bill would effectively kill rail-trails in the state of Kansas. These trails are an important economic tool for many small towns in our state. The economic impact of killing rail-trails in Kansas would be severe.

Please include this written testimony into the record for the hearing tomorrow, March 5, 2012.

Thank you,

Brent Hall, President
Central Kansas Conservancy
