

## 2012 Kansas Statutes

**72-6455. High density at-risk pupil weighting.** (a) The high density at-risk pupil weighting of each school district shall be determined by the state board as follows:

(A) Except as provided in subparagraph (C), if the district has an enrollment of at least 35%, but less than 50% at-risk pupils, the state board shall:

(i) Subtract 35% from the percentage of at-risk enrollment in the district;

(ii) multiply the amount determined under clause (i) by .7; and

(iii) multiply the number of at-risk pupils enrolled in the district by the product determined under clause (ii). The resulting product is the high density at-risk pupil weighting of the district.

(B) If the district has an enrollment of 50% or more at-risk pupils, the state board shall multiply the number of at-risk pupils by .105. The resulting product is the high density at-risk pupil weighting of the district.

(C) If the district has an enrollment of at least 35.1% at-risk pupils and an enrollment density of at least 212.1 pupils per square mile, the state board shall multiply the number of at-risk pupils by .105. The resulting product is the high density at-risk pupil weighting of the district.
