

2012 Kansas Statutes

82a-1036. Initiation of proceedings for designation of intensive groundwater use control areas; duties of chief engineer; findings. Whenever a groundwater management district recommends the same or whenever a petition signed by not less than three hundred (300) or by not less than five percent (5%) of the eligible voters of a groundwater management district, whichever is less, is submitted to the chief engineer, the chief engineer shall initiate, as soon as practicable thereafter, proceedings for the designation of a specifically defined area within such district as an intensive groundwater use control area. The chief engineer upon his or her own investigation may initiate such proceedings whenever said chief engineer has reason to believe that any one or more of the following conditions exist in a groundwater use area which is located outside the boundaries of an existing groundwater management district: (a) Groundwater levels in the area in question are declining or have declined excessively; or (b) the rate of withdrawal of groundwater within the area in question equals or exceeds the rate of recharge in such area; or (c) preventable waste of water is occurring or may occur within the area in question; (d) unreasonable deterioration of the quality of water is occurring or may occur within the area in question; or (e) other conditions exist within the area in question which require regulation in the public interest.
