

CONCEPTUAL AMENDMENT

TO: Chairman Pat Apple
And Members of the Senate Committee on Utilities

FROM: Whitney Damron
On Behalf of Kansas Gas Service

CC: Mick Urban, Kansas Gas Service
Scott Jones, KCP&L

RE: SB 374 – Energy Efficiency

DATE: March 20, 2014

Chairman Apple and Members of the Committee:

Throughout discussions on energy efficiency, the primary concern of KGS has been the issue of fuel switching for residential customers and in particular, the incenting of changes from natural gas to heat pumps.

In discussions with KCP&L today, we have reached an agreement in principle to amend SB 374 in the appropriate place as determined by your Revisor to address this concern as follows:

Energy efficiency programs shall not include programs to incent fuel switching for residential heating systems.

Kansas Gas Service would agree to support SB 374 with the inclusion of this amendment.

Thank you.

Whitney Damron
