UI tax amount and tax rate determination with taxable wage base of \$8,000 - Kansas

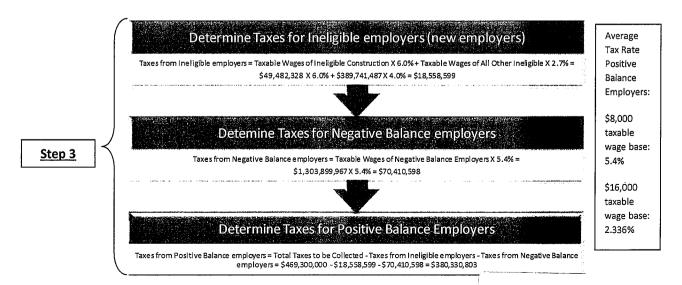

<u>Step 1</u> below calculates the reserve fund ratio for 2015. This is used to determine the tax rate on total wages. As evident below, taxable wages have no role in determining the tax rate paid.

<u>Step 2</u> involves calculating the tax rate on taxable payroll (first \$8,000 of the annual pay) and calculating the total taxes to be collected

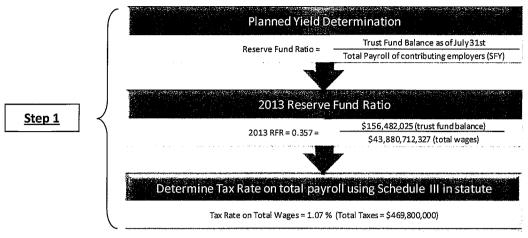

<u>Step 3</u> requires calculating the taxes to be collected by the three types of employers 1) Ineligible (new), 2) Negative Balance, and 3) Positive Balance Employers. Note that this example does not take into account HB 2676, which sets the tax rates for positive balance employers through CY 20148.

UI tax amount and tax rate determination with taxable wage base of \$16000 - Kansas

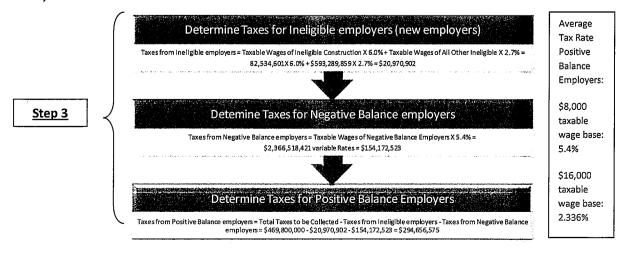

Step 1 below calculates the reserve fund ratio for 2013. This is used to determine the tax rate on total wages. As evident below, taxable wages have no role in determining the tax rate paid.

<u>Step 2</u> involves calculating the tax rate on taxable payroll (first \$16,000 of the annual pay) and calculating the total taxes to be collected

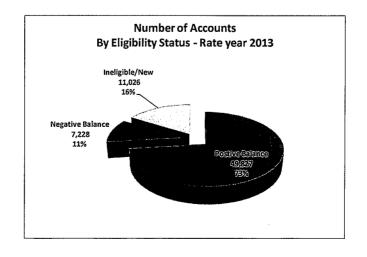

Step 3 requires calculating the taxes to be collected by the three types of employers 1) Ineligible (new), 2) Negative Balance, and 3) Positive Balance Employers. As seen below, increasing the taxable wage base results in Ineligible and Negative balance employers paying more taxes, which will reduce the amount of taxes to be paid by positive balance employers and therefore reducing their tax rates. Note that this example does not take into account HB 2676, which sets the tax rates for positive balance employers through CY 2014, since it is assumed that HB 2676 will be allowed to expire if the taxable wage base is increased. For 2013, Positive Balance Employers would have saved \$65,442,331 if the taxable wage base was \$16,000 (before adjusting for HB 2676).

Distribution of UI Taxes by Quarter

| | | Qtr. 1 (April) | Qtr. 2 (July) | Qtr. 3 (Oct.) | Qtr. 4 (Jan.) | Total |
|----------------------------------|---|----------------|---------------|---------------|---------------|-------------|

Claimant Exhaustion of Ulby Weeks

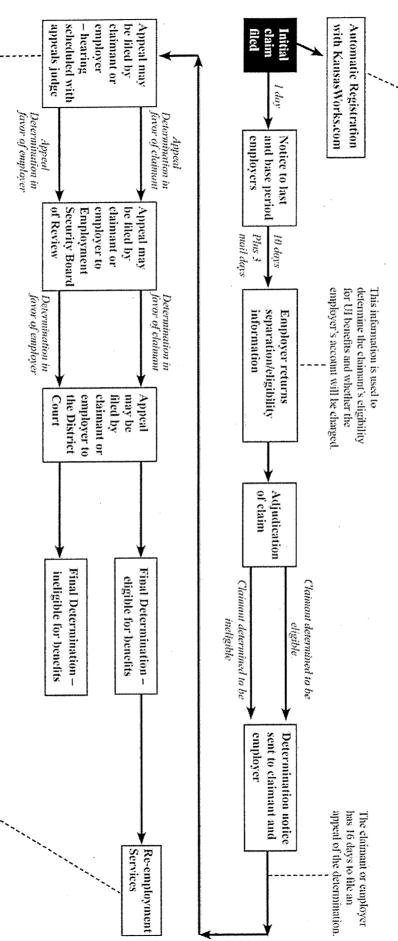

In 2012, there was a total of 8,239 claimants who received 26 weeks of benefits out of a total of 72,823 claimants on regular Unemployment benefits.

Claimants who are permanently severed from employment must look for work each week to maintain eligibility. Those who are temporarily laid off or are members of a placement union do not need to seek work but must be available to accept a recall to work.

UI Initial Claim and Employer Notification Process

Permanently unemployed workers are assessed to determine the likelihood they will exhaust their UI benefits. Those determined to have a greater than 51% chance of exhausting are placed into a pool from which they are scheduled to receive re-employment services

from their local workforce center.

The claimant or the employer has I6 days to file an appeal of the

Appeal Judge's determination
