

March 6, 2013

To Kansas House Education Committee,

I am writing to encourage you to stay away from Common Core. I believe there are elements within Common Core that are harmful to the individual. It's another example of Washington's one size-fits-all program solution to any issue.

They use pretty language like **Race-to-the-Top** when in reality it is a race to mediocrity.

Please do not involve us in any way shape or form with Common Core. Kansas knows what's best for Kansas.

Thank you,

Win Campbell, Lawrence, Kansas
