

March 3, 2016

The Honorable Jene Vickrey, Chairperson  
House Committee on Calendar and Printing  
Statehouse, Room 372-W  
Topeka, Kansas 66612

Dear Representative Vickrey:

**SUBJECT:** Fiscal Note for HB 2537 by House Committee on Federal and State Affairs

In accordance with KSA 75-3715a, the following fiscal note concerning HB 2537 is respectfully submitted to your committee.

HB 2537 would amend the state's Expanded Lottery Act. First, the bill would allow the voters of Sedgwick County to file a petition with the Sedgwick County Election Office to hold a special election to allow the Kansas Lottery to operate electronic gaming machines at a parimutuel racetrack facility located in Sedgwick County. The bill would require the signatures of at least 5,000 qualified voters in Sedgwick County and would require the special election to occur within 120 days after the petition has been certified. If the voters of the special election approve the ballot measure, then the Executive Director of the Kansas Lottery would be authorized to enter into a contract with Wichita Greyhound Park to operate electronic gaming machines at that facility. The bill would also require gaming facility managers to pay for the gaming related expenses of the Kansas Lottery and would make other technical corrections to the Kansas Expanded Lottery Act.

Current law allows for the first 2,200 machines to be allocated and then a bidding process to place the remaining 600 machines occurs at a later date. The current bidding process allows lottery gaming facility managers to bid to prevent the placement of additional machines at racetrack gaming facilities. The bill would allow the Kansas Lottery to allocate the entire 2,800 authorized electronic gaming machines to be placed at racetrack gaming facilities; however, each racetrack gaming facility would be required to have at least 400 machines. Each horse or greyhound racetrack would be required to conduct a minimum number of races in order to operate electronic gaming machines.

The bill would change the distribution of net electronic gaming machine revenue from the racetrack gaming facility located in the northeast gaming zone that operates parimutuel horse racing by increasing the amount of revenue distributed to the racetrack gaming facility manager from 25.0 percent to 64.5 percent in the first and second year of operation and to 60.5 percent in

the third year and future years of operation. The amount of revenue that goes to the Live Horse Racing Purse Supplement Fund would be increased from 7.0 percent to 10.0 percent in the first and second year of operation and to 14.0 percent in the third year and future years of operation. To balance out these increases, a corresponding reduction in revenues is in the bill. The state's share in the Expanded Lottery Act Revenues Fund (ELARF) would be reduced from 40.0 to 22.0 percent; the current 3.0 percent share that is shared by the city and county would be reduced to 2.0 percent; the share going to the Problem Gambling and Addictions Grant Fund would be reduced from 2.0 percent to 0.5 percent; the 7.0 percent share going to the Live Greyhound Racing Purse Supplement Fund would be eliminated; and the 15.0 percent share of gaming revenues that is to be used for gaming expenses of the racetrack gaming facility manager would also be eliminated. Under current law, the 15.0 percent share of revenues can be used for any gaming expenses, subject to the agreement between the Kansas Lottery and the facility manager. The 1.0 percent share going to the Kansas Horse Fair Racing Benefit Fund would remain unchanged.

The bill would change the distribution of net electronic gaming machine revenue from racetrack gaming facilities located in the southeast or south central gaming zones that operate parimutuel greyhound racing by increasing the amount of revenue distributed to racetrack gaming facility managers from 25.0 percent to 68.0 percent. The bill would also create the Kansas Horse Council Fund and provide 0.1 percent of the revenues for the development, promotion, and representation of the equine industry in Kansas. To balance out these increases, a corresponding reduction in revenues is in the bill. The state's share in the ELARF would be reduced from 40.0 to 22.0 percent; the share going to cities and counties would be reduced from 3.0 percent to 2.0 percent; the share going to the Problem Gambling and Addictions Grant Fund would be reduced from 2.0 percent to 0.5 percent; the share going to the Kansas Horse Fair Racing Benefit Fund would be reduced from 1.0 percent to 0.4 percent; the 7.0 percent going to the Live Horse Racing Purse Supplement Fund would be eliminated; and the 15.0 percent share of gaming revenues that is to be used for gaming expenses of the racetrack gaming facility manager would be eliminated. The share going to the Live Greyhound Racing Purse Supplement would remain unchanged at 7.0 percent.

The bill would also remove the earning caps on both the Live Horse Racing Purse Supplement Fund and the Live Greyhound Racing Purse Supplement Fund. Under current law, the amount of electronic gaming machine revenue that is to be transferred to each of these funds is limited to an average of \$3,750 per machine per location.

The bill would require the official breed registering agencies for horses and greyhounds that have each been approved by the Racing and Gaming Commission, to make recommendations to the Commission on or before December 1, for the implementation of programs which would maximize the economic development benefits in rural Kansas. The bill would reduce the application fee from \$500 to \$50 for any fair association, horseman's nonprofit organization, or the national greyhound association of Abilene, Kansas. The organization licensing fee would be reduced from \$100 to \$25 for each day of racing. The bill would

eliminate some of the restrictions on simulcasting and would allow county fair associations to operate simulcasting for additional days.

Before any lottery gaming facility manager, racetrack gaming facility manager, or facility owner licensee pays any prize that requires the completion of an Internal Revenue Service form W-2G, the manager or licensee would be required to check the winner against the state debtor files maintained by the Department of Administration. If it is determined that the person is a state debtor, then the prize must be withheld to the extent of the amount owed.

The gaming facility manager or facility owner licensee would not be subject to any civil, criminal, or administrative liabilities for any prize that was mistakenly withheld provided that it was not due to any intentionally malicious, wanton, or negligent act by the gaming facility manager or facility owner licensee. The only remedy for a person whose winnings are wrongfully withheld would be to submit an appeal to the Department of Administration. Withheld winnings must be submitted to the State Treasurer and credited to the Department of Administration's Setoff Clearing Fund. The Department would be permitted to work with state-owned casinos and parimutuel racetracks for the purposes of the state debt setoff program. The bill would clarify that this program would not apply to Native American Tribal gaming facilities.

HB 2537 would not require additional staffing or expenditures by the Kansas Racing and Gaming Commission, the Kansas Lottery, or any other state agency unless a contract with a racetrack gaming facility manager is approved by the Kansas Lottery and a background investigation is approved by the Kansas Racing and Gaming Commission. Racetracks would first be required to obtain a parimutuel license from the Kansas Racing and Gaming Commission before they could negotiate with the Kansas Lottery for a contract to operate electronic gaming machines. The proposed changes to the distribution of gaming facility revenue could provide an incentive for the Woodlands Racetrack in Kansas City, Wichita Greyhound Park, and Camptown Greyhound Park in Frontenac to negotiate a contract with the Kansas Lottery in order to reopen these facilities with electronic gaming machines. A contract could not be approved with the Wichita Greyhound Park unless the voters of Sedgwick County first approve the operation of electronic gaming machines in a special election. The expenses of conducting a special election would be the responsibility of Sedgwick County. The Sedgwick County Election Commissioner has previously indicated that the costs associated with conducting a special election would be approximately \$124,000.

The Kansas Lottery indicates that the state is prohibited from designating additional areas of the state where gaming facilities are authorized until July 1, 2032. Conducting a revote to allow Wichita Greyhound Park to reopen with electronic gaming machines may be viewed as an expansion of gaming that is prohibited under the Kansas Expanded Lottery Act. If it is determined that HB 2537 violates this provision, the state would be required to refund privilege fees from already selected gaming facility managers plus a compounded annual interest rate of 10.0 percent. Currently, the state has received \$61.0 million in privilege fees from four gaming facility managers and it is estimated that interest payments would be at least \$40.8 million presumably to be paid from the State General Fund.

The Kansas Lottery indicates that it would need to hire between two and three new employees for each new gaming facility that would open as a result of this bill. However, without knowing the size of the proposed facility and when the facility would open, the Kansas Lottery is unable to make a precise estimate of its gaming related expenses. The Kansas Lottery indicates that when it has negotiated contracts with gaming facility managers, it has required that all of its gaming related expenses be reimbursed by the manager. Direct gaming expenses are billed directly to the specific gaming facility manager and indirect expenses are prorated to all managers.

The Kansas Racing and Gaming Commission indicates it would need approximately \$1.8 million and 21.00 FTE positions for each parimutuel racetrack that reopens for the annual costs to regulate both the racing and gaming activities. Start-up costs of approximately \$450,000 per facility would also be needed for expenses, such as background investigations, licensing equipment, software licenses, computer equipment, furniture and supplies, and other expenses that would be associated with reopening each facility. Funding for regulating racing activities has primarily come from the transfer of parimutuel tax receipts to the State Racing Fund. The appropriations bill each year provides the authority for the Kansas Racing and Gaming Commission to bill each facility for all costs related to regulating racing activity. The requirements of the debt-setoff program would require additional staff time to modify regulations, facility operator internal controls, and audit programs. However, it is estimated that the costs associated with these activities would be negligible and, under the Kansas Expanded Lottery Act, would be reimbursed by gaming facility operators.

The Department for Aging and Disability Services indicates that additional gaming facilities would likely increase demand for services provided by its Problem Gambling Program. The Department indicates that the amount of additional spending would be dependent on the number of additional gaming facilities and would be proportional to current spending levels for problem gambling and addiction services. The Department also has concerns that additional gaming facilities and changes to the share of gaming facility revenues that is distributed to the Problem Gambling and Addictions Grant Fund would not provide adequate funding to support its Problem Gambling Program.

The Department of Administration indicates that expanding the debt setoff program would require computer programming to make sure that prizes or winnings at state-owned casinos would be subject to the debt setoff program. The Department of Administration indicates that the costs associated with programming existing software to implement the debt-setoff requirements of the bill would be negligible and could be absorbed within existing resources.

Based on data from similar legislation passed in the State of Colorado, the Department for Children and Families (DCF) anticipates that the bill would increase child support collections by \$157,300, annually (110 intercepts X \$1,430 per intercept). In calendar year 2009, Colorado's child support collections program collected approximately \$396,000 through 277

The Honorable Jene Vickrey, Chairperson

Page 5—HB 2537

intercepts or about \$1,430 per intercept. It is expected that the Kansas average collection per intercept would be similar. The Department states that while Kansas and Colorado child support enforcement caseloads are comparable in size, Colorado has more gaming sites than Kansas. As a result, it is estimated that Kansas would have about 40.0 percent of the Colorado intercepts or approximately 110 gaming intercepts per year. DCF indicates that nearly all of the total amount that would be collected under the bill would be distributed to Kansas families. The only expense DCF expects to incur is the recovery assistance fee imposed by the Department of Administration which would be \$10 for each intercept or approximately \$1,100 per year which could be absorbed within existing DCF resources.

A reliable estimate of the gaming facility revenue that might be generated as a result of HB 2537 cannot be made without a detailed market study, which would include an estimate as to when the gaming facility would be operational, the location of the gaming facility, the size of the gaming facility, and if the new gaming facility would impact revenues from existing gaming facilities. Any fiscal effect associated with HB 2537 is not reflected in *The FY 2017 Governor's Budget Report*.

Sincerely,

A handwritten signature in black ink, appearing to read "Shawn Sullivan", with a horizontal line extending to the right.
