

2016 Kansas Statutes

82a-1348. Same; conservation plans and practices required. Each member of a water assurance district shall adopt conservation plans and practices for such member. Such plans and practices shall be consistent with the guidelines for conservation plans and practices developed and maintained by the Kansas water office pursuant to K.S.A. 74-2608, and amendments thereto. Prior to entering into a contract with an assurance district, the director of the Kansas water office, in consultation with the chief engineer, shall determine whether such plans and practices are consistent with the guidelines for conservation plans and practices adopted by the Kansas water office.

History: L. 1986, ch. 392, § 7; July 1.
