

February 11, 2020

Dear Education Committee Members,

I am writing to ask you to support representative Heubert's bill HB 2601
On Thursday February 13th at 1:30pm

My name is Bethany Rowley.

I am a Kansan born and raised.

I am not anti vaccines, but I am pro parental rights, and free choice when it comes to health. I am concerned that this proposed bill will remove those choices for those most at risk.

Some may feel that those at risk will be taken care of by their doctors

However, in this day and age doctors are scared to write vaccine exemptions because it could essentially put their license at risk.

Taking away health freedoms always hurts more people than it saves. I believe it is of the utmost importance that we are able to keep our freedoms.

Bethany Rowley
