Re: HB 2601

Dear Representative Steve Huebert, Chairman of the Education Committee,

My testimony is simple! I have 4 children ages 14, 11, 6, and 8 months, NONE of which have ever had ANY vaccines in their entire lives! They are all extremely healthy with zero chronic health issues. When they get sick, which is very rarely, they are well in 24-48 hours using only natural means!!! They have all seen a doctor and have passed wellness exams with flying colors!!! I am a research librarian with a degree in education.

I have been researching vaccines since the late 90s and I knew when I had my first baby in 2005 I would not be vaccinating. I also have a step granddaughter who is 3 who has never received ANY vaccines and she is just as healthy as my children. If you want to see people continuing to send their children to public school then you can not let these mandates come to fruition. Because people WILL remove their children from public school and homeschool them in vast numbers. We have the RIGHT to choose what we put into our bodies and the bodies of our children. If vaccines become mandated then we are NOT truly free!!!! Thank you for taking time to read this.
