

I have been living in the state of Kansas for 12 years and since I arrived, I have been asking for favors and even annoying my acquaintances because I have the need to drive to take my family to all the places they need.

I do not have a driver's license and that prevents me from buying a vehicle in my name much less to register and remove a license plate and of course I can not get insurance, so every day my family and I leave with the blessing of our God and with his favor of our relatives or friends to whom if for some reason they will have an accident or a traffic ticket their record would affect them and that is why our situation is even more difficult.

On some occasions, I thought about moving to a state where I could get a driver's license but that affects my children in their schools and me in my work, since it is not easy to get a job without official identification.

That's why we have a great need to be heard and I hope you take into account that especially the majority of the immigrant community would benefit us if this law is passed but above all it would help to increase the economy in the state since we could all buy a car , register it and pay for insurance but above all it would be a state with greater security in our streets and highways since to drive we would have to pass an eye exam and we would have greater knowledge of the traffic laws.

Sincerely,

Pedro Morales
