Testimony in Support of House Bill No. 2614
House Committee on Transportation
February 19, 2020

Requiring large and color-contrasted signage on the front windshield and passenger-side rear window of personal vehicles used for providing prearranged rides would help passengers in identifying those vehicles.

We live in a continuing care retirement community in Lenexa, Kansas. As an alternative to public transportation such as KC Ride we utilize Uber and Lyft to arrange for rides to dialysis and other medical appointments. We support legislation that provides uniform requirement for signage on personal vehicles used for self-arranged rides.

We ask the Transportation Committee to advance HB 2614 to the House with a recommendation to enact into law.
