

2020 Kansas Statutes

65-5304. Licensure of business entities; qualifications; requirements. In order to qualify for a license, a business entity shall:

- (a) Ensure that each employee or agent of the business entity who will come into contact with asbestos or who will engage in an asbestos project is trained in accordance with all applicable asbestos training provisions required by the United States department of labor and the environmental protection agency;
- (b) demonstrate to the satisfaction of the secretary that the business entity is capable of complying with all applicable requirements, procedures, standards of the United States environmental protection agency and the United States occupational safety and health administration and the secretary;
- (c) have access to at least one approved asbestos disposal site for deposit of all asbestos waste that the business entity will generate during the term of the license; and
- (d) comply with all rules and regulations adopted by the secretary under this act.

History: L. 1985, ch. 203, § 4; L. 2016, ch. 20, § 3; July 1.
