

I am a “PROPONENT of HB 2498”

Kristina L. Mikesic
Kansas City, KS
House district. 36

To: Madam Chair Landwehr and the House Committee on Health and Human Services:

Please sign this HB 2498 into law. I vaccinated my children through the years with known vaccines. This Covid 19 is not a vaccine nor is it the one that has been approved because the states do not actually have access to it.

I denied my daughter the HPV vaccine when it came out and multiple visits with my daughter’s doctor. For multiple reasons: too young, not active sexually and the biggest after several questions over years and an answer that said this would prevent cancer. At which point I knew it was a lie...How can we prevent cancer? When we can’t even cure it?

This shot is too new but with what we do know there is too much against it to give it to children of any age who have a 99.9 percent survival rate. Please stop with the mandates, masks, shots, and everything else. Let people make a choice if you want to give this to your child feel free but do not make the rest of us do it. FREEDOM of CHOICE

For those of you who have sold out to big pharma you will be judged at some time soon. This is not for me to do but pray that your eyes are opened in this time in this moment and do what is right. The killing of people for money and power and control must end.

Respectfully,

Kristina L Mikesic
