Dear Holly,

I'm writing as a proponent of HB 2513! Social Emotional Learning (SEL) is invasive to students and needlessly burdensome to educators. HB 2513 will inform parents and prevent schools from collecting massive amounts of data from unknowing students. Parents have the right to know what information their children are being asked to provide as they have the primary obligation of keeping their children and the child's information safe. SEL-related questions should not even be the primary focus of public education.

Thank you,
Betty Mattingly-Ebert
