Manhattan, KS 66503

Dan Kerschen  
Kansas Senate  
Topeka, KS 66610

Dear Senator Kerschen:

I am writing you for your support of Senate Bill 261. As an active asbestos abatement contractor in the state of Kansas, we believe in having a close relationship with the Bureau of Air and in particular the Asbestos Division. By allowing them to keep the funds derived from the fees we pay for notifications, licenses, and fines, it would allow them to provide better oversight of the contractors doing the work in our field. We pride ourselves in doing a safe, quality job and adhering to the rules, but there are a lot of contractors that do not take their mandate as seriously as we do. We would welcome any increase in funds to this office that can be provided.

If you have any questions about our business or how we interact with the Bureau of Air, do not hesitate to contact me.

Sincerely,

Greg Legleiter
