

Dear Chairman Erickson and Committee members

My name is Debbie Detmer at 10816 W. 64 Terrace, Shawnee KS

I am against government mandates of Covid-19 vaccines and masking of our children in schools.

STOP GOVERNMENT AND SCHOOL OVERREACH OF MASKS AND VACCINE MANDATES.

I value Liberty and Freedoms and our constitutional rights and freedoms are being trampled on and ignored.

Governor Kelly obliterated our economy and our personal lives with shutdowns. The Johnson County Commissioners then took control following her mandates and masking everyone. Still at this moment without even the power to do so have mandated children in schools to be masked. We need the MASK MANDATES to STOP completely. The mask does not work. If you can breathe the virus can be transmitted. It spread through airborne particles and NOT DROPLET transmission. I requested a KORA from the Johnson County Health Department for a USA scientific evidence research paper that has been peer-reviewed that concludes; masks prevent the spread of SARS COVID-19. They did NOT produce such evidence. The Shawnee Mission School board members continue to mask our children at schools and silenced the parent's voices. By separating comment portion of meeting from the meeting its self and still limiting the people that can come into the meeting. THE OVER REACH OF CONTROL AND ABUSE OF POWER AND THEY ARE DENYING FREE SPEECH.

We have a federal government and President abusing its powers and forcing businesses to mandate vaccinations for all employers. Kansas must stand up against this. There is NO HERD IMMUNITY THROUGH VACCINATION. The vaccinated can get the Covid virus. The vaccinated can transmit the Covid virus. The vaccinated can still die from the Covid virus. **We need the freedom of body autonomy and freedom to make our own health choices like always before. We already have laws make them work and pass more that prevents all this overreach of control and power.**

The FDA just approved vaccines for our children 5 to 11. While, admitting all the adverse reactions of the children 12 to 18 .This must never be a mandate for vaccinations on our children. The children are at extremely low risk of dying of Covid-19; Stanford research finds that **children infected with Covid have a 99.9973% survival rate.** The vaccine does not work very well as stated above. There has been many **CATASTROPHIC SIDE EFFECTS** of vaccines. The CDC's own website reporting Adverse Event Reporting System (**VARES**) showed astonishing increases particularly in the children ages 12-15, 16-17, and 18-24.

**WE NEED YOU LEGISLATORS to pass bills to protect the people of Kansas NOW from these mandates.**
