

Dear Legislators:

As a farm family and property owner for many years in Kansas, we want to express our concern and opposition to any forced land use in our state. Participating in a government program by choice is much different than being required to give up our private property to public exploitation.

Please do not support implementation of the 30 x 30 land development initiative.

Thank you for your service to our state and your consideration of our request.

Sincerely,
Max & Kathy Martin
