HB 2434 Proponent Written Testimony

To Whomever It May Concern:

I am Charity a concerned citizen writing to take a stand with you against fines for suspended driver's license.

It has tremendously affected our community and not in a positive way. We are breaking the law just to go to work to pay fines. I believe the do away with fines will help stimulate Kansas economy and help decrease the rate of assistance needed from the Gov. If people are paying fines, they can't afford groceries, utilities, or even family night. That effects farmers and people in agriculture and wherever else the money could've been spent to raise economy. Not only that if you look at statistics most citizens with suspended license are minorities. I believe it would also give a new hope to a generation suffering from depression. There are so many benefits by making sure that we all are successful as Americans.

Please pass this bill and make Kansas the great state to stay instead of coming on vacation leave on probation with a suspended license.
